Letterhead Certificate for the Export of Egg Product to the Republic of Korea

Date Issued: _____

Certificate Number: _____

1. Egg products are regulated and inspected by USDA's Food Safety and Inspection Service.
2. Eggs are analyzed by the U.S. Food and Drug Administration (FDA) for chemical contaminants, including drug residues, pesticide residues, dioxins and PCB's. Eggs are also subject to periodic FDA total diet surveys, which includes analysis for pesticides, heavy metals, radionuclides and dioxins.
3. Egg products from this facility are legally distributed in the U.S. for human consumption. As such, the manufacturer is required to comply with relevant food standards.
4. Egg products from this facility are subject to recall and/or legal consequences if found to be out of compliance with U.S. food regulatory standards.

Signature of Official Veterinarian: _____
